WHAT MEASURES ARE YOU TAKING TO REDUCE SINGLE USE PLASTIC BIN LINERS?

Does this
look familiar?

Double bagging
& thick plastic liners

Excess
Plastic Usage

Oversized bags
only 20% full

easi recycling

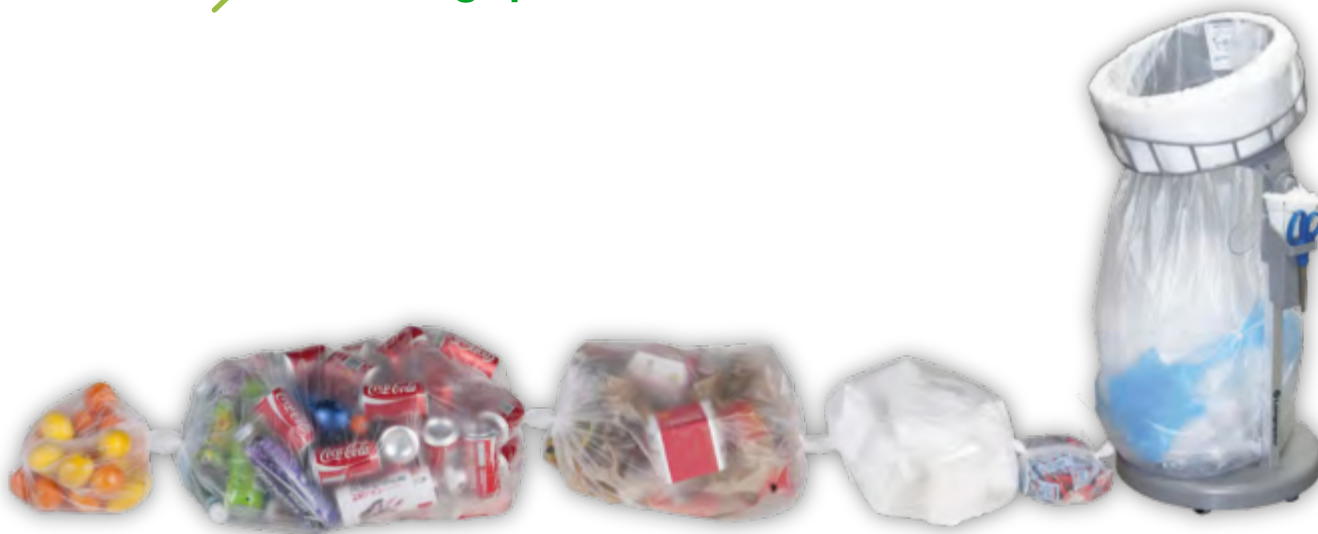

Reduce Plastic Usage
By

70%

50%
Thinner

4x
Stronger

→ with **Longopac Continuous Liners**

LONGOPAC

THE most hygienic waste bin in the world

Endlessly Clever, Continuously Green

110m long, sealed bin
Liner cassette

Adjustable tilting
head for quicker
easier loading

Easy to clean with
minimal surface
area

Extremely strong,
3 ply liner reduces
bag splitting

Wheels for better
mobility

Self clean
opening as
new bag is
pulled through

The smarter way to bag waste

Immediate relining
No wasted time fetching bags

Cleaner & safer. Empty from the side,
not the top. No hand contact with waste

HOW TO USE

Gather liner, remove
excess air in bag

1

Apply two cable ties
(or tie two knots)

2

Cut off bag and remove

3

Simply pull down the liner

Done! Ready to use again

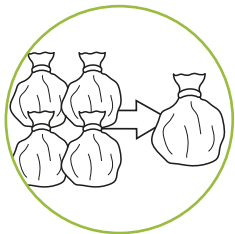

4

Empty & Re-line Your Bin In
Only 20 Seconds

LONGOPAC

CONTINUOUS LINER SYSTEM

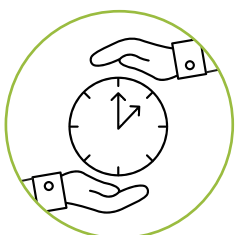

Reduce Plastic Usage

- Reduce plastic usage with bin liners by 70%
- Only use as much as you need - no wasted liner
- Special 3-ply liner is 50% thinner but 4 times stronger than standard bags
- No more double bagging

Increase Recycling & Save Money

- Increase recycling rates by up to 58% with translucent liners
- Bags are always 100% full - no bag wastage
- Increase productivity and reduce downtime
- Reduce waste collection costs as bags are compacted

Saves Time & Labour

- Reduce time & labour relining bins by 38%
- Quick to load. Large openings make it easy
- Quick to empty & reline. The next liner is always on hand. In 20 seconds, you're ready to go again.

LONGOPAC

CLASSIC BIN

- Possibly the quickest & most hygienic bin in the world
- Floor-standing with wheels
- With tilted heads for easy loading
(Mini bin head is adjustable)
- Heavy duty version available, with stainless steel legs and wheels, blue base and head - for food environments

Large opening

Heavy duty version

HYGIENE PROTECTION

Kills 99.9% CoronaViruses (including Covid 19)

*Say goodbye to bacteria with
the new **PURE ZONE®**!*

THE NEW ANTI-MICROBIAL FILM

The antimicrobial film **PUREZONE** is a trialed and tested solution which meets hygiene and safety requirements **24/7, 7 Days a week, for upto 5 years.**

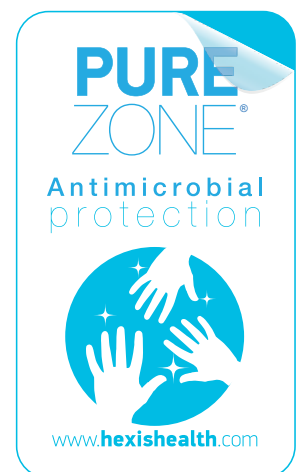

This technically sophisticated high-quality film provides effective **long-lasting protection** for **public spaces, buildings or public transportation**. It can be applied under any circumstances and in all locations with high sanitary requirements, such as clean retail counters, nurseries, childcare facilities, hospitals, transportation, libraries, gyms or malls, in-fact almost any common areas that allow bacteria to grow.

ANTIMICROBIAL, TRANSPARENT FILM

- **Patented technology** - tested for antimicrobial efficiency
- **Kills 99.9% of bacteria**
- **Active up to 5 years** - indoor, vertical exposure
- **Inhibits the development of 99.99% of the germs**
- **Non Irritant** - safe for use on human skin
- **Flexible Application** - can be applied to most surfaces
- **Resistant** - to most chemical agents, alcohol, diluted acids, oils

THE PURE ZONE LABEL

To allow your clients, community, staff and partners to identify the protected areas, the **PUREZONE** label should be applied to treated surfaces doors, counters, windows thus indicating a safe to touch zone visibly re-assuring those who come in contact with it.

**24/7
7 DAYS
A WEEK**

**EASY TO
CLEAN**

**PATENTED
TECHNOLOGY**

**DURABLE
UP TO
5 YEARS**

ANTI-MICROBIAL FILM

Germs need humidity to proliferate.

The Hexis film is waterproof and forms a barrier against humidity.

**THIS IS A DECISIVE
INNOVATION**

During cleaning operations, as well as in the presence of humidity, silver ions are released from the top layer of the film.

These ions come into contact with the bacteria, blocking their metabolism and/or interrupting their proliferation mechanism, leading to their destruction

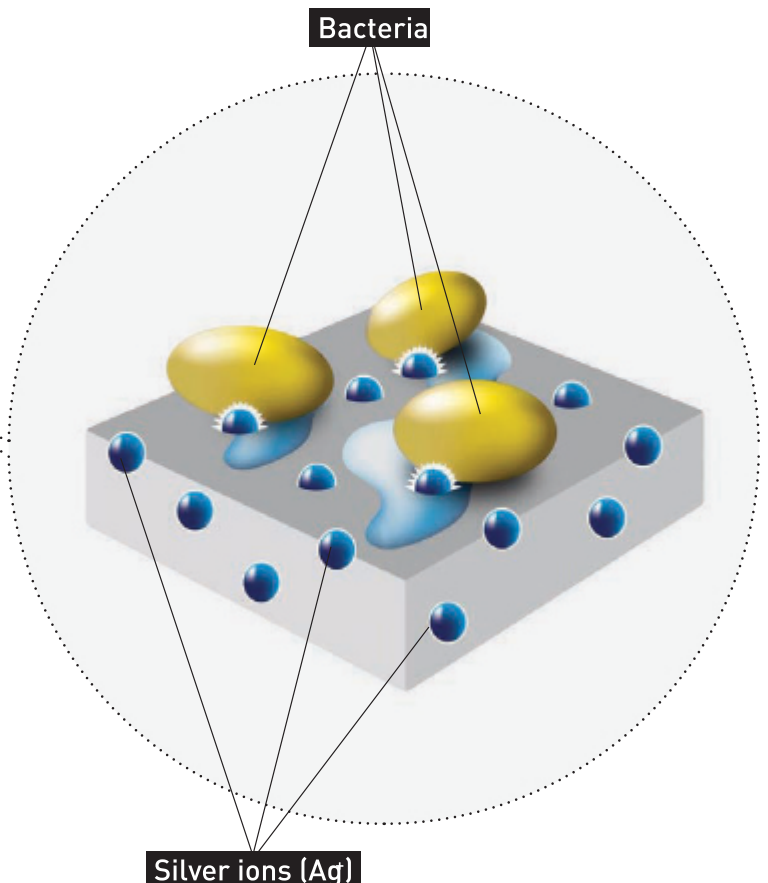

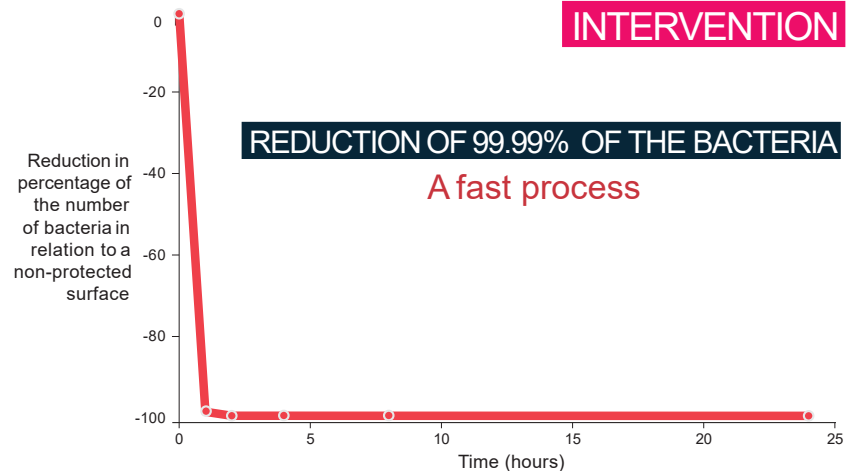

When the PVC film is manufactured by Hexis, silver ions encapsulated in a glass matrix are distributed over the film in a uniform manner.

THE ANTI-MICROBIAL EFFICIENCY OF SILVER IONS

- Protects 24h a day, 7 days a week
- Protects inaccessible areas
- Inhibits the development of 99.99% of the germs (tests in conformity with the ISO22196 standard)
- Reduces a bacterial population by 4 logs
- Prevents the formation of biofilm
- Active for 5 years
- Perfectly ecological

**WITHOUT
HUMAN
INTERVENTION**

Performance and protection anywhere, anytime

- Make your recycling station fit your interior design
- Improve signage and engagement in recycling
- Enhance your Corporate Social Responsibility by advocating sustainability
- Reduce general waste collection costs, due to correct segregation

TAILOR YOUR MULTI-BIN RECYCLING STATION

Match Your Interior Design

Some of our clients want specific colours, graphics and finishes to match the interior design of their offices, kitchen & breakout facilities. We can help with a broad range of options.

Demonstrate Your Brand's Commitment

So many more people now care about sustainability & recycling at work, which means companies are having to demonstrate that they care too and implement solutions to make it easier for staff to do the right thing at work.

Make It Easy

People will typically take the path of least resistance (the easiest option). We can help to make correct recycling and segregation easy at work. We offer super clear signage with colour-coding & icon graphics, larger apertures and advice regarding the placement of stations.
