Colour: Light grey or white

Included dispenser with 1000 wet wipes

Disinfection of Covid-19, E.coli, Listeria, Salmonella & MRSA

For offices, shopping centres, airports, shops & waiting areas

Lockable wheels

The Longopac Welcome Station will help stop spreading infections and diseases in public areas.

The Longopac Welcome Station is a mobile disinfection station with two lockable wheels, which makes it easy to move between different areas. The cabinet has been designed for all public spaces such as offices, shopping centres, airports, shops and waiting rooms.

The cabinet is available in two colours; a nice light grey or white. You also have the possibility to add i.e. **'Welcome'** to the back board as well as **'Waste'** around the opening to the Longopac cassette in your own language for a more welcoming presentation.

The dispenser comes included with 1000 wet wipes to minimize the risk of infections and viruses spreading. The wipes are effective against E.coli, Listeria, Salmonella, MRSA and viruses incl. COVID-19.

The product comes as a flat pack solution and is easy to ship and assemble. The cabinet is equipped with our Longopac holder and should be used together with a Longopac Mini cassette. Under the holder you will find a compartment for storage of extra wet wipes and more Longopac cassettes.

Note that the Welcome station is for indoor use only!

HYGIENIC

- Bags are replaced and sealed from the outside – no contact with the waste.
- Spillages around the opening are collected by the next bag.
- Simple to clean.

EFFICIENT

- The Longopac Welcome station is to be loaded with a Longopac bag cassette 60 or 75 meters in length.
- Variable bag size for flexible changing intervals.
- New bag always in place.
- Bag always securely sealed.
- Quick bag replacement – less than 30 seconds.
- Less cleaning – waste never misses the bag.
- Variable bag size always ensures bags are 100% full.

ENVIRONMENTALLY FRIENDLY

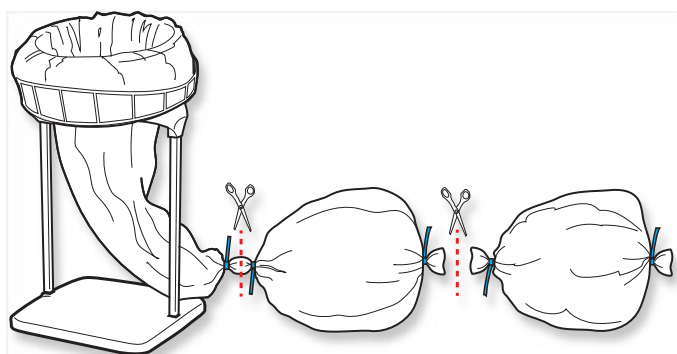

The cassette holder is loaded with a cassette that is available in a variety of strengths and colours. The cassette is called Longopac.

- Longopac bag material is made from 3-ply polyethylene, which affords low raw material use in combination with a high level of strength.
- Life cycle analyses show that it has less than 70% carbon dioxide compared to traditional waste bags.
- Always 100% fill level.
